

SHIVANSH GUPTA

7394887890 | sshivanshg@gmail.com | LinkedIn | GitHub | LeetCode

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Bash, Go
Frameworks: Next.js, React, Node.js, Express, FastAPI, Prisma
Cloud: AWS (EC2, S3, RDS, Lambda, CloudFront, ALB), Cloudflare (Workers, D1, R2, KV, Durable Objects)
DevOps: Docker, GitHub Actions, Nginx, PM2, Vercel, Linux
Databases: PostgreSQL, MongoDB, Redis, SQLite, pgvector
AI / ML: Langchain, RAG, Agentic Workflows
Architecture: Multi-tenant SaaS, Microservices, REST, WebSockets, SSE, Job Queues
Testing: Pytest, Vitest, Jest

EXPERIENCE

- Back End Developer, Intern** Jan 2025 – Mar 2025
RenewBuy Gurugram, India
- Cut API latency by 20–35% and raised cache hit rate from 25% to 45% by building a Redis caching layer for high-traffic health insurance APIs.
 - Boosted return-user completion by 8–18% by designing a progress persistence system to recover mid-funnel drop-offs in multi-step purchase flows.
 - Eliminated regression risk on critical workflows (OTP, KYC, policy issuance) by authoring a comprehensive Pytest suite for secure insurance edge cases.
- Full Stack Developer, Intern** Apr 2025 – Aug 2025
Wonder Creative Studio Bengaluru, Remote
- Developed backend APIs for an architect–client collaboration portal covering project customization, media management, and role-based access control.
 - Managed AWS infrastructure (EC2, S3, Docker, Nginx) including provisioning, CI/CD, monitoring, and zero-downtime deploys.

PROJECTS

- RAMT — Regime-Adaptive Multimodal Transformer** | Equity forecasting system [GitHub](#)
- Researched cross-sectional equity return forecasting on the NIFTY 200 universe across 6 iterations — daily XGBoost/LSTM baselines, a custom Transformer with RegimeCrossAttention + Mixture of Experts + TournamentRankingLoss, and a LightGBM diagnostic; diagnosed RAMT’s prediction collapse as architectural (data scarcity at rebalance scale), not a feature problem.
 - Final strategy — 21-day momentum rank, top-5 sector-diversified selection, HMM-gated position sizing — achieved Sharpe 0.83, CAGR 13.5%, and 64% win rate over 25 monthly rebalances on NIFTY 200 (Jan 2024–Jan 2026), beating the index by 5.8 pp CAGR after 22 bps friction.
- TinyTalesVideos** | AI-personalized children’s storybook + video platform [tinytalesvideos.com](#)
- Run an AI-personalized storybook and video platform with 2,000–3,000 MAUs and ~10% paid conversion, generating illustrated books and narrated videos from a child’s photo and theme.
 - Built a multi-stage agentic pipeline (Fal.ai, PuLID, Grok Imagine, ElevenLabs, FFmpeg) with async workflows and state machines; cut AWS costs via S3 caching, batched ListObjectsV2, and batch deletes.

EDUCATION

Rishihood University Sonipat, Haryana
B.Tech, Computer Science and Artificial Intelligence (SGPA 7.0) *Expected 2027*

LEADERSHIP & COMMUNITY

- Core Committee, Neutron Techfest** Feb 2024 to Feb 2026
- Led marketing and social media across two editions; 2,000+ registrations and 1,400+ on-ground footfall.
- Board Member, Damru Cultural Fest** Aug 2025 to Jan 2026
- Oversaw the inaugural fest end-to-end from concept to execution.
